

Selling cascarones in Santa Barbara?

Confetti is harmful to our environment, and difficult and expensive to clean up after parades and festivals.

Shiny metallic confetti, sequins, and glitter are all made of **plastic**, which is not biodegradable and is often mistaken for food by birds and animals.

Help keep Santa Barbara clean and beautiful!

- Please only use paper confetti.
- We discourage the use of metallic (Mylar) confetti, sequins, and glitter.
- We discourage plastic and foam decorations on the exteriors of cascarones.
- We discourage the sale of bags of confetti.
